

About PBXDom:

PBXDom helps companies better understand their phone system activity. With more than 1.8 billion calls logged, PBXDom knows what it takes to analyze, store and optimize company phone system. Clients can use PBXDom to track incoming and outgoing calls, monitor performance, receive smart alerts when customers are in danger of slipping through the system and improve company responsiveness. The cloud-based service provides companies with unlimited data for up to five years of phone calls, with real-time dashboards to provide an up-to-date analysis of those calls from anywhere on the planet.
